The Future of Cryptography

2008 NSF Cyber-Trust PI Meeting

Yale University, New Haven, CT

March 16-18, 2008

- In today's cryptographic theory, what are the techniques and tools that seem obviously useful but are not in use?

- Why are these cryptographic techniques and tools not in use?

- What, if anything, should the Cyber-Trust research community be doing to advance their use?

- What can NSF do to improve both the state of Cyber-Trust research and the interaction between researchers and the rest of the technological world?
